 Sep 20, 2018 Vanessa Schmid, DVM
 Sep 20, 2018 Vanessa Schmid, DVM Stitches openes up:

Subjective

Reason for Visit: Emergency
 Stitches openes up

Objective

General Appearance: Bright, alert and responsive; good body condition
Eyes: Corneas clear, pupils normal size, symmetrical; sclera white, no ocular discharge
Ears: No exudate observed; no redness present
Integument: upper lip suture missing, 1 inch open wound, nice pink granulation bed
Oral Cavity: Teeth are free from excessive tartar; gums are pink and moist; no gingivitis present
Lymphatics: Lymph nodes all normal size
Cardiovascular: Regular rhythm; no murmur detected; strong femoral pulses; CRT < 2 sec
Musculoskeletal: Ambulates normally
Gastrointestinal: Normal eliminations; palpates normally
Urogenital: Owner reports normal eliminations; external genitalia appears normal; bladder palpates normally
Respiratory: Lungs auscultate clear; trachea clear
Neurologic: No apparent abnormalities

Assessment

suture missing
 open wound -> healing well

Plan

dis options
 1) ATH, anesthesia, reclosure
 2) let heal by 2nd intension
 O elected option 2
 extended abx and anti-inflammatory for another 5 days

Sep 14, 2018	Jolene Whirt	Owner called and said that Billy Bear se:			

Subjective

Reason for Visit: Refill
 Owner called and said that Billy Bear seems painful. Would like something for pain for him. Checked with Dr. Schmid, ok to fill tramadol.

Objective

General Appearance: Bright, alert and responsive; good body condition
Eyes: Corneas clear, pupils normal size, symmetrical; sclera white, no ocular discharge
Ears: No exudate observed; no redness present
Integument: upper lip sutures, 1 inch opening
Oral Cavity: Teeth are free from excessive tartar; gums are pink and moist; no gingivitis present
Lymphatics: Lymph nodes all normal size

Cardiovascular: Regular rhythm; no murmur detected; strong femoral pulses; CRT < 2 sec
Musculoskeletal: Ambulates normally
Gastrointestinal: Normal eliminations; palpates normally
Urogenital: Owner reports normal eliminations; external genitalia appears normal; bladder palpates normally
Respiratory: Lungs auscultate clear; trachea clear
Neurologic: No apparent abnormalities

Assessment

suture missing, open lip wound

Plan

dis options

- 1) ATH, sx to reclose wound
- 2) can attempt to allow to heal by 2nd intension

Sep 13, 2018	James Rowe, DVM	Lacerations on nose and planum nasale.:			

Subjective

Reason for Visit: Emergency
 Lacerations on nose and planum nasale. Fights with neighbor dog through fence.

Objective

Vitals: 8:27pm 9/13/18 Wt: 16 lb. oz. HR: 136 RR: pant CRT: <2 By: JRo

General Appearance: Bright, alert and responsive; good body condition
Eyes: Corneas clear, pupils normal size, symmetrical; sclera white, no ocular discharge
Ears: nr
Integument: laceration on l side of upper lip- through and through. Full thickness laceration under L nostril
Oral Cavity: L upper canine has split in gum line over the tooth but the tooth is not freely moveable.
Lymphatics: nr
Cardiovascular: Regular rhythm; no murmur detected; strong femoral pulses; CRT < 2 sec
Musculoskeletal: nr
Gastrointestinal: nr
Urogenital: nr

Patient: Billy Bear

Pomeranian

Client: Renee & Louis C. Martini

Respiratory: nr

Neurologic: nr

Assessment

Full thickness lacerations requiring surgical closure.

Plan

IV catheter. .2ml iv valium. IV propofol and intubation with isoflurane maint. Unisyn 210mg IV.
Clip/flush and debride wounds. Close SQ with 3-0 pds hor. mattress and skin with 3-0 ethilon simp
int. Some sutures are on the lingual side of lip and sedation will be required to remove them. .15ml
buprenex given IM post op.

Rx-Clavamox 125mg bid x 7. Rx-carprfen 25mg sid x 7.

Discharge

Recheck in 3 days or sooner if sensitive on L side of mouth/tooth. Sutures out in 10 days (sedation
will probably be required) and evaluation of L upper canine for necrosis.

Sep 13, 2018

James Rowe, DVM
